

MANAV BAGHEL

Backend Developer

New Delhi, India | [+91 79705 87185](tel:+917970587185) | manavbaghel@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend-focused software engineer with production experience in Java, Spring Boot, and Python/Flask. Built and deployed GrabBite, a 126-endpoint food delivery platform handling real-time order tracking, payment processing, and role-based access across three user types. Comfortable owning a system end-to-end, from database schema to production deployment.

TECHNICAL SKILLS

Languages: Java, Python, C++, C, JavaScript
Backend: Spring Boot, Flask, Spring MVC, Servlets, JSP, JDBC, REST API Design
Frontend: React, HTML, CSS, JavaScript
Databases: PostgreSQL, MySQL
Tools & Platforms: Docker, Git, Railway, Vercel, Postman
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Cloud Computing, Compiler Design

PROJECTS

GrabBite — Full-Stack Food Delivery Platform [Live Demo](#) | [GitHub](#)

Flask · PostgreSQL · WebSockets · Razorpay · Waitress WSGI

- Architected and shipped a 126-endpoint platform (57 JSON APIs, 69 web routes) serving customers, restaurant owners, and admins with distinct role-based access control.
- Integrated Razorpay payments with HMAC-SHA256 webhook signature verification to prevent tampered or spoofed transaction callbacks.
- Enforced production-grade security — CSRF protection, signed password-reset tokens, and Flask-Limiter rate limiting — validated through concurrent load testing.
- Load-tested the API layer at up to 50 concurrent clients, sustaining a 24.8ms average response latency with 100% success under normal load; diagnosed a WebSocket thread-pool bottleneck under the Waitress WSGI server and mapped the fix to an async worker model.
- Deployed and maintained the platform in production on Railway.

Synapse — RAG-Based Document Q&A Assistant [GitHub](#)

Flask · Groq LLaMA 3.3 70B · ChromaDB · Docker · PostgreSQL — In Development

- Building a retrieval-augmented generation pipeline using ChromaDB for vector storage and Groq's LLaMA 3.3 70B for low-latency document Q&A.
- Containerized the application with Docker and designed the PostgreSQL schema for sessions, document metadata, and query history.

EXPERIENCE

Web Development Intern — Webplat Technologies

Jun 2025 – Aug 2025

- Contributed to backend web development using Python and Flask over an eight-week internship.

EDUCATION

B.Tech, Computer Science Engineering

Expected Graduation: August 2027

Baba Banda Singh Bahadur Engineering College (BBSBEC), Punjab

CGPA: 8.0
